How winners are selected and what you get

05 **Eligibility & Registration**
Who can participate and how to apply

EVENT HIGHLIGHTS →

- Live Product Showcases
- Expert Mentorship
- Investor Pitch Opportunity
- Awards & Recognition

CodeVibe

CodeVibe is a one-day AI startup and product showcase where student teams and early-stage founders build and present working prototypes or MVPs using AI-powered coding tools like Codex, Claude Code, OpenCode and more.

Turn ideas into real products, get expert feedback, and explore opportunities to pitch your vision to investors.

Build with AI

Use AI coding tools to turn ideas into working prototypes.

Expert Feedback

Get insights from mentors, industry leaders and investors.

Growth Opportunity

Selected teams get a chance to pitch to investors for further support.

// EVENT JOURNEY +

04

From Prototype to Possibility

A complete journey designed to help you build, showcase and take your AI-powered product to the next level.

01

Registration & Screening

Submit your product idea, problem statement and team details. Selected teams will be invited to participate.

02

Build Your Prototype / MVP

Build your working prototype or MVP using AI coding tools like **Codex**, **Claude Code**, **OpenCode** and more.

03

Product Showcase

Set up your booth and demonstrate your working product, explain the tech behind it and its real-world impact.

04

Expert Evaluation

Get feedback from industry experts, investors and successful founders on product, technology, market potential and execution feasibility.

05

Investor Pitch Opportunity

Selected finalist teams will pitch their products in front of a panel of investors for funding and further support.

// SHOWCASE THEMES +

05

What Can You Present?

We welcome AI-powered products and innovative solutions across a wide range of domains.

AI & Automation

Tools and solutions using Artificial Intelligence.

SaaS & Productivity

Products to make work, learning and everyday tasks better.

EdTech

Innovative solutions for education and skill development.

FinTech

Financial tools and solutions for a better tomorrow.

Campus & Social Innovation

Solutions for campus life and community impact.

Open Innovation

Any other impactful tech product or service.

Have a unique idea?

If it solves a real problem using technology and has a working prototype or MVP, we want to see it!

Showcase Your Potential

Your product will be evaluated by a panel of industry experts, entrepreneurs and investors based on the following criteria.

Product Functionality
Working demo, technical implementation and user experience.

Problem Relevance
How well it solves a real-world problem.

Innovation & Uniqueness
Originality and use of technology.

Market Potential
Scope, target audience and scalability.

Business Model
Viability and go-to-market strategy.

Team & Execution Readiness
Capability and plan for future development.

Top teams will get a chance to present their product in front of a panel of investors.

Investor pitching opportunity is for selected teams only, subject to final evaluation.

Who Can Participate?

Students & Early-Stage Founders

Open to all academic branches and years. Both student teams and early-stage founders can participate.

Team Size

2 to 4 members per team.

Product Stage

Working prototype or MVP is required. The product should be demonstrable during the event.

Key Points

- [x] Open to all undergraduate and postgraduate students
- [x] Students from all academic branches are welcome
- [x] Early-stage tech founders can also apply
- [x] No prior startup registration required
- [x] Only working prototypes or MVPs are eligible
